Mr. Bruce Johnson
Central Intelligence Agency ODP
Washington, D.C. 20505

Dear Mr. Johnson:

Enclosed is a course abstract for an Executive Technology Seminar which Amdahl plans to make available to government executives. Amdahl is conducting a pilot program for selected government executives on July 30, 1981.

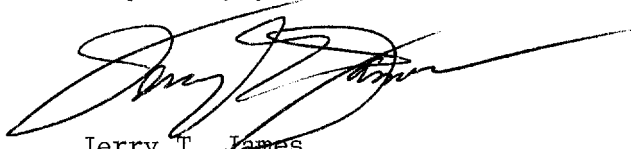

I would like to invite you and to participate in this pilot program. The Agency's long range ADP plan holds a special interest to Amdahl. I expect that your contribution and feedback will supply Amdahl Management with valuable product planning information and will also serve to refine and improve this pilot seminar.

STATINTL

Because this is our first attempt at structured executive education, we are offering this seminar at a cost of \$1,000 per person. This charge covers tuition, materials, air transportation, meals and lodging.

I will contact you soon regarding this invitation.

Very truly yours,

Jerry T. James
Account Executive

EXECUTIVE TECHNOLOGY SEMINAR

Amdahl Education

ABSTRACT

The Executive Technology Seminar provides today's data processing executives with familiarity of current and future data processing systems from an architectural and packaging point of view. During the seminar, executives will have the opportunity to review the latest large-scale system designs and discuss common management and forecasting issues.

AUDIENCE

Data processing executives such as Computer Center Directors, Managers of Computer Technical Operations, Managers of Information Planning, who require the latest information on computer technology for their long range planning efforts.

OBJECTIVES: Upon completion, attendees will be able to:

- Discuss the evolution of large scale computer architecture
- Evaluate the relative merits of computer cooling alternatives
- Implement the control mechanisms necessary to realize the benefits of a multi-vendor data processing environment

TOPICS

The First Three Generations, An Overview
Large Scale Integration (LSI)
Very Large Scale Integration (VLSI)
Packaging of a Super Computer
Cooling of a Super Computer
Software — The True Investment
Multi-Vendor Management Issues
Reliability, Availability, and Service
The PCM World — Now and Soon
